PROFILE

Discovering the beauty beneath the cold and emotionless Russian winters fuelled my passion for finding solutions. Starting as a software engineer honed my technical skills, but a deeper connection to problems led me to the world of UX/UI design where I bring my unique touch to create meaningful experiences for users.

WORK EXPERIENCE

EROAD

Dec. 2021 – Present

UX/UI Designer and Full-Stack Engineer

Auckland, NZ

- Building front-end (in **React Native**) for the fatigue management mobile app in Australia & NZ ([EROAD Assist](#))
- User research and User Interface work on updating the legacy reporting system (**Figma**).
- Complete re-skin of the UI of a current [ELD](#) (electronic log device) app on **Android**. Involving building custom screens (**Kotlin**) and completely restricting and beautifying the current ones (**XML + Java**).
- Maintenance of current PROD and DEV infrastructure (Microservices + Deployment) using **Azure DevOps**

Coretex

Jan. 2021 – Dec. 2021

Graduate Software Engineer

Auckland, NZ

- Delivering and building mobile applications (in **React Native**) for truck drivers working at logistic companies in New Zealand & Australia to track their driving hours and breaches (**EWD**).
- Building a reusable component library (using **React Native** and **Storybook**) to have consistent UI across the organization and ease of testing & documentation.
- Developing new API endpoints to generate users for Detox testing on the existing back-end using **C#**, **SQL** and **.NET** which led to improvement in development and testing speeds.
- Setting up and using automated testing tools such as **Detox**, with elements of manual Q&A to ensure apps pass our quality bar – achieving a greater user experience.

EDUCATION

University of Auckland – Bachelor's in Computer Science & Information Systems

7.37 GPA | July 2020

- Certificates of Outstanding Achievement in AI, Human-computer Interaction, Computer Graphics and Machine Learning

PROJECTS

Magic CAP – private client

Figma, TypeScript, TailwindCSS, NextJS

- Designed the UI/UX and built the front-end of a dashboard web application. The app focuses on data analysis using Similarweb to identify pirated websites and generate reports for government submission.

Shwoop - <https://shwoop.co.nz>

Adobe XD, Figma

- UI/UX design lead for a mobile app that reached #1 on the app store upon release.
