PROFILE

Attention is the most valuable asset in life, and that's why I prioritize detail in everything I do. In my role as a software engineer, this means crafting precise and reliable software solutions. I'm driven by the desire to work on projects that have a positive impact, ensuring that my work helps people in meaningful ways.

WORK EXPERIENCE

Catch Design **Apr.2023 - Present**
Frontend Engineer Auckland, NZ

- Developed over 10 websites, primarily using SCSS with React and Storyblok CMS. Occasionally thrown into the deep end with PHP and SilverStripe.
- My proudest achievement is the complete rework of the Australian National Couriers ([ANC](#)) website, which included two parts: a user-facing static site and a parcel tracking and inquiries system
- Integration of serverless functions to ensure the website is not just fast, but lightning fast.

EROAD **Dec. 2021 – Apr.2023**
Full-Stack Mobile Engineer Auckland, NZ

- Building front-end (in **React Native**) for the fatigue management mobile app in Australia & NZ ([EROAD Assist](#))
- User research and User Interface work on updating the legacy reporting system (**Figma**).
- Complete re-skin of the UI of a current [ELD](#) (electronic log device) app on **Android**. Involving building custom screens (**Kotlin**) and completely restricting and beautifying the current ones (**Java**).
- Maintenance of current PROD and DEV infrastructure (Microservices + Deployment) using **Azure DevOps**

Coretex **Jan. 2021 – Dec. 2021**
Graduate Software Mobile Engineer Auckland, NZ

- Delivering and building mobile applications (in **React Native**) for truck drivers working at logistic companies in New Zealand & Australia to track their driving hours and breaches (**EWD**).
- Building a reusable component library (**React Native** and **Storybook**) to have consistent UI across the organization and ease of testing & documentation.
- Setting up and using automated testing tools such as **Detox**, with elements of manual Q&A to ensure apps pass our quality bar – achieving a greater user experience.

EDUCATION

University of Auckland – Bachelor's in Computer Science & Information Systems **7.37 GPA | July 2020**

- Certificates of Outstanding Achievement in AI, Human-computer Interaction, Computer Graphics and Machine Learning
